

SOLUTIONS TO SUPPORT YOU

MOS COMMITMENT TO THE HEALTHCARE INDUSTRY

Count on us:

To achieve your goal, you need to deal with two businesses in one: taking care of people, while taking care of the bottom line. MOS can help you accomplish both. Count on us.

We are there when you need us

The unwavering goal of the healthcare community is to care for people. However, 21st century obstacles - inaccessible data, inefficient processes, disruptive technology, regulatory mandates, rising costs and challenging economics - threaten to undermine the work of healthcare organizations. Michigan Office Solutions (MOS) represents the best of both worlds when it comes to your business solutions - the national resources and strength of Xerox and 3D Systems and the agility of MOS locally managed services and support team. MOS can help you apply, manage and use technology that simplifies caregiver workloads. So you have more time to focus on delivering the level of care everyone deserves.

Our technology services and solutions make healthcare operations simpler for healthcare professionals. We can help you optimize technology and your business process operations through our MOS 360° Assessment. Through this assessment we can help you organize content, streamline processes and print less with our managed print services. The results: improved access to patient data, tighter regulatory compliance, greater operational efficiencies, reduced administrative costs and better health outcomes.

Solutions designed for you

- **Medical Modeling with 3D Print** - provide surgeons with accurate planning models created from CT/CBCT scans for use in planning some of the most complex surgeries performed today
- **Records Management** - Digitally store and organize medical records with a digital content management software solution.
- **Healthcare Forms Automation** - more efficient process of receiving and processing invoices for approval and payment.
- **HIPAA Compliant Software and Device Solutions** - develop a roadmap to identify compliance issues and implement security measures to protect patient information.
- **Data Storage, Backup and Archival** - digital storage drives requirements for efficient storage, reliable backups and compliance-based archival solutions.

Get back to focusing on what you do best, we'll take care of the rest.
